

THE NEW YORK HERALD.

WHOLE NO. 8057.

MORNING EDITION—SATURDAY, SEPTEMBER 25, 1858.

PRICE TWO CENTS.

THE DUDLEY UNIVERSITY.
SPEECHES OF THE GATHERING OF LETTERS BY
TO THE FRIENDS OF THE DUDLEY OBSERVATORY.

On the 6th of September the undersigned addressed a letter to Dr. Gould, of Boston,乞援信，
in which he stated his full refutation
of the misstatements contained in a recent pamphlet, signed by
Messrs. Thomas W. Olcott, Ira Harris, Robert H. Pray, and
six others, and entitled "A Statement of the Objections of the
Scientific Council—Statement of the Trustees," which would take
place in due time. He informed the public, meanwhile, that
the great majority of the statements made in that pamphlet
to Messrs. Arms, Arrowsmith, Peet, which had been published
by the authors of the pamphlet, had been garbled and
distorted by omission, insertion, and alteration.

The author of the pamphlet, and the undersigned, having fortunately retained press copies of the original letters, has, at the earnest instance of friends,
written a few words to clear up the errors, which though perhaps not intrinsically the worst, are most readily
understood by persons not familiar with the case.

To a ready understanding of the contents
of the various alterations and perversions might perhaps seem comparatively trivial; but upon careful inspection they will be found to have been artificially contrived and elicited by a
hostile intent to injure the cause of science or argument.

No attempt is now made to enter into any disputation of the
legitimate illustrations, which are almost exclusively confined to one particular kind of garbling
it may be remarked that the various italics employed are, in
almost every instance, of that kind of garbling, which, although their introduction frequently gives a different meaning to the sentence.

Now the letters quoted in the pamphlet as addressed "to the trustees" were actually so addressed. The strictly private
character of most of them is sufficiently indicated by the hasty
collateral style.

DUDLEY OBSERVATORY, Sept. 8, 1858.

FROM THE STATEMENT OF DR. ARMY,
DATED NEW ORLEANS, LA., MARCH 23.

It strikes me that the whole set
of circumstances, Hall and Amos & Associates, as also perhaps
Dr. Arms, Dr. Arrowsmith, Peet,
etc., invited in a spirit of
two names that you
will be able to meet the eye of any one, excepting him to whom they were
confidentially addressed. To
me, however, it will be a
little difficult, having no sight of
the United States, and on
ask for him to do what he can
as he merits.

As soon as the states shall
be open, I will send full and
detailed information
to Albany, where I will
determine, and draw in
meridian lines, &c., and super-
miser foundations, and the
placing of the stones for the
observatory.

In short, all of the three
quarters will do, though I can
see, from Tripe's Hill, the
stones and in making the
modifications of building is
the greatest part.

I will be much obliged to
you if you will burn this sheet
in confidence, the dorms to your personal re-
marks upon it.

DR. ARMY.

TO THE EDITOR OF THE HERALD.

On the 23d of March he wrote to Dr. Gould, "I have written
to weigh all the names of the
parties invited, carefully, in
order to ascertain whether
any of the invitations, by
according them to second or
third rate people."

Dr. GOULD, Jr.

TO THE EDITOR OF THE HERALD.

On the 23d of March was given
by Dr. Gould, at this time,
to the Observatory Association
the name of the Observers
and the Observatory sent forth to
all parts of the State, an entire
success. Even the character
of the Observatory Association
engaged his attention. On
the 23d of March he wrote to Dr.
Arms, "I have written to weigh
all the names of the
parties invited, carefully, in
order to ascertain whether
any of the invitations, by
according them to second or
third rate people."

Dr. GOULD, Jr.

TO THE EDITOR OF THE HERALD.
